

## MAIN TITLE:

## SUBTITLE

### Summary

Three or four sentences that summarize the issues and your proposed recommendations. Or outlines what is contained in this paper.

Example (Ramsar. 2017):

*Degradation of wetlands reduces resilience against water-related hazards such as floods, droughts and storm surges. Integrating wetlands as natural infrastructure for disaster risk reduction (DRR), alone or in conjunction with traditional “hard” infrastructure, can mitigate hazards and increase the resilience of local communities and those living across entire river basins or coastal zones.*

### Policy Recommendations

- *Keep these short and realistic*
- *Example: Recognize the roles of wetlands in DRR, emphasizing the value of their wise use as a significant and cost-effective component of DRR strategies*
- *Sentence*
- *Sentence*

## INTRODUCTION / BACKGROUND

What is the problem?

Why is it an important problem? (Why should the reader care about this and what is the impact of the problem on people, livelihoods, ecosystems?)

What is causing the problem?

What are the effects?

How can the reader deal with it? (What are the prospects for action for the reader?)

## CURRENT POLICY / LEGAL FRAMEWORKS/ REGULATION

What is the current policy, legal framework and regulations surrounding this problem?

What is the effect of the current or future policies/regulations?

What are the future options for these policies/regulations?

What are the advantages or disadvantages of each option?

### Case Study

.... Short and focused on the subject

## PROSPECTS FOR THE FUTURE / RECOMMENDATIONS

Quick summary of the situation

What is the solution proposed?

What are the benefits of your solution?

What are the negative impacts of not addressing the problem?

What challenges remain?
